

# Butyl Glycol

Part No. RXSOL-20-2099-025 — Generated 06 Oct 2026

## 1. Product and Company Identification

|              |                   |
|--------------|-------------------|
| Product Name | Butyl Glycol      |
| Part Number  | RXSOL-20-2099-050 |

Company Details:

RX MARINE INTERNATIONAL  
105, A wing , BSEL , TECH PARK.  
VASHI ,NEW BOMBAY 400703 INDIA

Branch : Kandla, Mumbai , Chennai, Vizag, Kolkata, UAE , OMAN , CANADA and KENYA

|         |                                                          |

## 2. Composition / informationon ingredients

|               |          |        |
|---------------|----------|--------|
| Chemical Name | Cas No   | Whight |
| Propionitrile | 111-76-2 | > 99 % |

## 3. Hazards Identification

|                                         |                                                                                                                                                                               |
|-----------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Classification according to UN GHS 2009 | Classification of the substance and mixture: Flammable liquids: Cat.4 Serious eye damage/eye irritation: Cat.2A Acute toxicity: Cat.4 (oral) Skin corrosion/irritation: Cat.2 |
| Signal Word                             | Warning                                                                                                                                                                       |
| Hazard Statements                       | H227 Combustible liquid.<br>H319 Causes serious eye irritation.<br>H315 Causes skin irritation.<br>H302 Harmful if swallowed                                                  |

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                      | <p>P280 Wear protective gloves and eye protection or face protection.</p> <p>P280 Wear eye protection.</p> <p>P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.</p> <p>P270 Do not eat, drink or smoke when using this product.</p> <p>P264 Wash contaminated body parts thoroughly after handling.</p> <p>Precautionary Statements (Response):</p> <p>P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.</p> <p>P301 + P312 IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell.</p>                 |
| Precautionary statements                             | <p>P302 + P352 IF ON SKIN: Wash with plenty of soap and water.</p> <p>P330 Rinse mouth.</p> <p>P332 + P313 If skin irritation occurs: Get medical attention.</p> <p>P337 + P313 If eye irritation persists: Get medical attention.</p> <p>P362 + P364 Take off contaminated clothing and wash it before reuse.</p> <p>P370 + P378 In case of fire: Use alcohol-resistant foam, carbon dioxide, dry powder or water spray for extinction.</p> <p>Precautionary Statements (Storage):</p> <p>P403 Store in a well-ventilated place.</p> <p>Precautionary Statements (Disposal):</p> <p>P501 Dispose of contents and container to hazardous or special waste collection point</p> |
| Other hazards which do not result in classification: | <p>If applicable information is provided in this section on other hazards which do not result in classification but which may contribute to the overall hazards of the substance or mixture. See section 12 - Results of PBT and vPvB assessment.</p>                                                                                                                                                                                                                                                                                                                                                                                                                          |

## 4. First Aid Measures

|                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| General advice                                             | <p>.Remove contaminated clothing. If the patient is likely to become unconscious, place and transport in stable sideways position (recovery position). If not breathing, give artificial respiration. First aid personnel should pay attention to their own safety.</p>                                                                                                                                                                                                                                                                                                                                                                          |
| If inhale                                                  | <p>Keep patient calm, remove to fresh air, seek medical attention.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Eye Contact                                                | <p>Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Skin Contact                                               | <p>Wash thoroughly with soap and water</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Ingestion                                                  | <p>Immediately rinse mouth and then drink 200-300 ml of water, seek medical attention.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Most important symptoms and effects, both acute and delaye | <p>Symptoms: Information, i.e. additional information on symptoms and effects may be included in the GHS labeling phrases available in Section 2 and in the Toxicological assessments available in Section 11.</p> <p>Hazards: Skin resorption hazard.</p> <p>Information, i.e. additional information on symptoms and effects may be included in the GHS labeling phrases available in Section 2 and in the Toxicological assessments available in Section 11.</p> <p>(Further) symptoms and / or effects are not known so far</p> <p>Treatment: Treat according to symptoms (decontamination, vital functions), no known specific antidote</p> |

## 5. Fire-fighting Measures

|                                |                                                                                                                                                                                                                                            |
|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Flammability                   | Flammable liquid Cool endangered containers with water-spray. See SDS section 7 - Handling and storage                                                                                                                                     |
| Suitable extinguishing media   | dry powder, water spray, carbon dioxide, alcohol-resistant foam                                                                                                                                                                            |
| Unsuitable extinguishing media | water jet .                                                                                                                                                                                                                                |
| Special protective equipment:  | Wear a self-contained breathing apparatus. Special protective equipment for firefighters                                                                                                                                                   |
| Further information            | Evacuate area of all unnecessary personnel. Fight fire from maximum distance. Extend fire extinguishing measures to the surroundings. Dispose of fire debris and contaminated extinguishing water in accordance with official regulations. |
| Additional information:        | Use extinguishing measures to suit surroundings.                                                                                                                                                                                           |

## 6. Accidental Release Measures

|                                       |                                                                                                                                                                                                                                                                               |
|---------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Personal precautions                  | Handle in accordance with good industrial hygiene and safety practice. Avoid all sources of ignition: heat, sparks, open flame. Use antistatic tools                                                                                                                          |
| Environmental Precaution              | Discharge into the environment must be avoided.                                                                                                                                                                                                                               |
| Methods for cleaning up or taking up: | For large amounts: Pump off product.<br>For residues: Pick up with suitable absorbent material (e.g. sand, sawdust, general-purpose binder, kieselguhr). Dispose of absorbed material in accordance with regulations.                                                         |
| Additional information:               | High risk of slipping due to leakage/spillage of product.<br>Release of substance/product can cause fire or explosion. Shut off or stop source of leak. Shut off or stop released substance/product under safe conditions.<br>Pack in tightly closed containers for disposal. |

## 7. Handling and Storage

|                   |                                                                                                                                                                                                                                                                                     |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Handling          | Ensure thorough ventilation of stores and work areas. Prevent contact with air/oxygen (formation of peroxide).<br>Protection against fire and explosion:<br>Prevent electrostatic charge - sources of ignition should be kept well clear - fire extinguishers should be kept handy. |
| Storage           | Further information on storage conditions: Keep container tightly closed in a cool, well-ventilated place                                                                                                                                                                           |
| Storage stability | Storage temperature: = 35 °C The stability data given is only valid when stored under oxygen free inert gases or in containers that are impermeable to oxygen.                                                                                                                      |

## 8. Exposure controls and personal protection

|                                              |                                                                                                                                                                          |
|----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Components with occupational exposure limits | 2-butoxyethanol, 111-76-2;<br>TWA value 20 ppm (ACGIHTLV)<br>TWA value 50 ppm (OEL (TH))                                                                                 |
| Eye protection                               | Safety glasses with side-shields (frame goggles) (e.g. EN 166)<br><br>Body protection must be chosen depending on activity and possible exposure, e.g. apron, protecting |
| Body Protection                              | boots, chemical-protection suit (according to EN 14605 in case of splashes or EN ISO 13982 in case of dust).                                                             |

|                                                       |                                                                                                                                                                                                                                                                                                                                                                                    |
|-------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                       | Gas filter for gases/vapours of organic compounds (boiling point >65 °C, e. g. EN 14387 Type A)                                                                                                                                                                                                                                                                                    |

| Upper explosive limits    | 10.6 %(V) For liquids not relevant for classification and labelling.                                                                                                               |
| Ignition temperature      | 232 °C<br><br>No decomposition if stored and handled as prescribed/indicated.                                                                                                      |
| Decomposition temperature | Self ignition: Temperature: 20 °C<br>Based on its structural properties the product is not classified as selfigniting.<br>Test type: Spontaneous selfignition at room-temperature. |
| Self heating ability      | not applicable, the product is a liquid                                                                                                                                            |

|                                                    |                                                                                                  |
|----------------------------------------------------|--------------------------------------------------------------------------------------------------|
| Explosion hazard                                   | Based on the chemical structure there is no indication of explosive properties.                  |
| Fire promoting properties                          | Based on its structural properties the product is not classified as oxidizing.                   |
| Vapour pressure                                    | 0.8 hPa (20 °C) Literature data 1.17 hPa (25 °C) Literature data                                 |
| Viscosity dynamic                                  | 3.3 mPa.s (20 °C) The value was determined by calculation from the detected kinematic viscosity. |
| Density                                            | 0.9000 g/cm <sup>3</sup> (20 °C, 1,013 hPa)                                                      |
| Relative Density                                   | 0.9000 (20 °C)                                                                                   |
| Relative vapour density (air)                      | 4.08 (20 °C) Heavier than air.                                                                   |
| Solubility in water                                | Literature data. 900 g/l (20 °C)                                                                 |
| Solubility (qualitative) solvent(s)                | organic solvents soluble                                                                         |
| Partitioning coefficient n-octanol/water (log Pow) | 0.81 (25 °C) The data refers to the undissociated form of the substance.                         |
| Adsorption/water - soil                            | KOC: 2.82; log KOC: 0.45                                                                         |
| Surface tension                                    | 65 mN/m (20 °C; 2 g/l)                                                                           |
| Molar mass                                         | 118.18 g/mol                                                                                     |

## 10. Stability and reactivity

|                        |                                                                                                                                                                                                                 |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Conditions to avoid    | No special precautions other than good housekeeping of chemicals                                                                                                                                                |
| Thermal decomposition: | No decomposition if stored and handled as prescribed/indicated                                                                                                                                                  |
| Substances to avoid    | strong oxidizing agents                                                                                                                                                                                         |
| Corrosion to metals    | No corrosive effect on metal                                                                                                                                                                                    |
| Hazardous reactions    | Reacts with light metals, with evolution of hydrogen. Reacts with strong oxidizing agents. Hazardous decomposition products: No hazardous decomposition products if stored and handled as prescribed/indicated. |
| Chemical stability     | The product is stable if stored and handled as prescribed/indicated.                                                                                                                                            |
| Reactivity             | In the event of fire: see section 5                                                                                                                                                                             |

## 11. Toxicological information

|                              |                                                                                                                                                                                                                 |
|------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Acute toxicity               | Experimental/calculated data:<br>LD50 guinea pig (oral): 1,200 mg/kg (similar to OECD guideline 401)                                                                                                            |
| Acute inhalation toxicity    | LC0 guinea pig (by inhalation): > 2.25 mg/l 4 h (similar to OECD guideline 403)<br>No mortality was observed. The European Union (EU) has classified this substance as 'toxic' (Cat. 3). The vapour was tested. |
| Acute dermal toxicity        | LD50 guinea pig (dermal): > 2,000 mg/kg (OECD Guideline 402)                                                                                                                                                    |
| Acute toxicity other routes  | LD50 mouse (intraperitoneal): 1,174 mg/kg                                                                                                                                                                       |
| Assessment of acute toxicity | Of moderate toxicity after single ingestion. The inhalation of a highly enriched/saturated vapor-air mixture represents an unlikely acute hazard. Virtually nontoxic after a single skin contact.               |

|                                                                               |                                                                                                                                                                                                                                                                                        |
|-------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Symptoms                                                                      | Information, i.e. additional information on symptoms and effects may be included in the GHS labeling phrases available in Section 2 and in the Toxicological assessments available in Section 11.                                                                                      |
| Irritation                                                                    | <p>Assessment of irritating effects:<br/> Eye contact causes irritation. Skin contact causes irritation.<br/> Experimental/calculated data:<br/> Skin corrosion/irritation rabbit: Irritant. (BASF-Test)<br/> Serious eye damage/irritation rabbit: Irritant. (OECD Guideline 405)</p> |
| Respiratory or skin sensitization                                             | <p>Assessment of sensitization:<br/> Skin sensitizing effects were not observed in animal studies.<br/> Experimental/calculated data:<br/> Guinea pig maximization test guinea pig: Non-sensitizing. (OECD Guideline 406)</p>                                                          |
| Germ cell mutagenicity                                                        | <p>Assessment of mutagenicity:<br/> The substance was not mutagenic in bacteria. The substance was not mutagenic in mammalian cell culture. The substance was not mutagenic in studies with mammals.</p>                                                                               |
| Carcinogenicity                                                               | <p>Assessment of carcinogenicity:<br/> Indication of possible carcinogenic effect in animal tests. A clear indication of an increased risk of cancer in humans has so far not been shown. IARC Group 3 (not classifiable as to human carcinogenicity).</p>                             |
| Reproductive toxicity                                                         | <p>Assessment of reproduction toxicity:<br/> The results of animal studies gave no indication of a fertility impairing effect.</p>                                                                                                                                                     |
| Developmental toxicity                                                        | <p>Assessment of teratogenicity: In animal studies the substance did not cause malformations.</p>                                                                                                                                                                                      |
| Specific target organ toxicity - (single exposure)                            | Based on the available information there is no specific target organ toxicity to be expected after a single exposure.                                                                                                                                                                  |
| Repeated dose toxicity and Specific target organ toxicity (repeated exposure) | <p>Assessment of repeated dose toxicity:<br/> Damages blood cells. Due to the species specific mode of action, the effects are not expected to occur in humans.</p>                                                                                                                    |
| Other relevant toxicity information                                           | Skin resorption hazard                                                                                                                                                                                                                                                                 |

## 12. Ecological information

|                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|-------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                               | <p>Assessment of aquatic toxicity:</p> <p>There is a high probability that the product is not acutely harmful to aquatic organisms. Based on long-term (chronic) toxicity study data, the product is very likely not harmful to aquatic organisms. The inhibition of the degradation activity of activated sludge is not anticipated when introduced to biological treatment plants in appropriate low concentrations.</p> <p>Toxicity to fish:</p> <p>LC50 (96 h) 1,474 mg/l, <i>Oncorhynchus mykiss</i> (OECD Guideline 203, static)</p> <p>Nominal concentration.
